Hi Everyone,

Following our meeting with Krutarth on 17 September and our recent call discussion with Kunal, we have updated and reworked the **GroundUp AI PRD, TRD, and Database Architecture**.

Documents for review and verification by Monday, 21 September 2026:

- **PRD + TRD:** <https://hackmd.io/8SHQVEbETAmvow9O2ae8WQ>
- **Database Architecture:** <https://grounduperd.vercel.app>

Krutarth, thank you for your valuable support in clarifying the workflow and sharing the available data.

For our next discussion, we would like to focus on **AMHAR / Construction Loan Services** to clarify our remaining questions, validate our understanding, and identify key industry pain points.

Key Questions

1. Construction & Loan Timeline

- What are the key construction phases and loan milestones?
- When is the budget finalized, and how does it align with loan disbursements?

2. Draw Workflow

- What triggers a draw request, and what is the approval timeline?
- How are fully or partially rejected draws handled?
- How are draw statuses updated and tracked?

3. Draw Packet & Evidence

- What documents and data are included in the draw packet for **161 Woodlawn Ave.**?
- How are missing evidence and inspection delays handled?
- How does this impact the budget sheet and draw approval?

4. Reconciliation & Roles

- What is the complete revision and reconciliation process?
- What are the responsibilities of the builder, lender, inspector, and customer?

5. Post Construction

- How are warranties, claims, repairs, and follow-ups managed?

Key Objective: Understand the major pain points and identify where **GroundUp AI** can create the most value.

Kunal, we would also like to schedule a separate, focused meeting with you to discuss the **Construction + Finance timeline** in detail and clarify the remaining workflow questions.

We are planning to connect on **Thursday, 24 September 2026**. Please share your preferred time for a quick call.

Looking forward to aligning on the workflow and taking the next steps together.

Hi Kunal,

As part of our **GroundUp AI Phase 1 validation**, we are using **161 Woodlawn Ave** as the primary project to validate the end-to-end construction and finance workflow, including loan processing, budgeting, draws, inspections, approvals, funding, and reconciliation.

Krutarth has shared the initial data with us. To complete the validation, could you please share the following documents **by today**, so we can analyze them before our next meeting?

1. Loan and Financial Documents

- Construction loan agreement and loan approval or commitment documents
- Loan ledger and transaction history
- HUD settlement statement
- Loan disbursement and outstanding balance records

2. Budget and Expense Records

- 161 Woodlawn Ave budget sheet
- Expense ledger and budget versus actual records
- Invoices and checks for RA Design, Home Depot, Tomich, O.E.A, and RVC

- Vendor payment records.

3. Draw and Payment Records

- Draw requests and complete draw packages
- **AIA G702 Application and Certificate for Payment and AIA G703 Continuation Sheet.**
- Schedule of Values and payment applications
- Draw approval, rejection, partial approval, and revision records
- Approved versus funded amounts and funding confirmation documents
- Lender comments and draw related correspondence
- Email format or communication used to submit draws to the bank or lender

4. Construction and Supporting Documents

- Construction schedule and milestone timeline
- Draw timeline
- Inspection and lender inspection reports
- Work Progress site photos and other draw supporting evidence
- Building and trade permits
- Contractor or subcontractor agreements and change orders

5. Reconciliation and Closeout

- Draw to budget and loan to budget reconciliation
- Lien waivers, retainage records, final draw, and closeout documents.

If there are any other documents related to the 161 Woodlawn Ave project please share that data as it would help us understand the end-to-end data process.

This will help us accurately map the real project process and proceed with the **GroundUp AI Phase 1 validation**.

Hi team,

The 161 Woodlawn project is now complete and on the market. Moving forward, I believe the best approach is to transition to a new project that is currently in construction and nearly finished. This will allow us to gather accurate, live results. Everything remains the same, except for the project details and the accounting, which we will share with you.

Krutarth – Could you please update the numbers in the Broadway file and share it with everyone so they have the actual amounts to reconcile?

Hi all,

Thank you for sharing the [73 Broadway](#) data and documents. We have started reviewing the available budget, accounting and finance records.

We have attached the **73 Broadway Query Sheet** containing the questions identified from the data received so far:

73 Broadway – Query Sheet

Please review the queries and provide the required documents, including:

- **American Express Itemized Statements**
- **BCB Bank Statements**
- **Vendor Invoices and Bills for Construction Expenses**
- **Bank Records for Internal and Project-to-Project Transfers**
- **Loan Approval Documents and Draw Records**
- **Funding and Disbursement Records**

Once these are received and the queries are clarified, we can proceed with the **73 Broadway Phase 1 reconciliation and GroundUp data validation**.

Hi Dharmesh,

We have updated the PRD, TRD, and ERD based on our current understanding of the project requirements and the work completed so far.

PRD + TRD: <https://hackmd.io/8SHQVEbETAmvow9O2ae8WQ>

Database Architecture: <https://grounduperd.vercel.app>

Could you please review the documents and share your feedback? We would also appreciate your guidance on the overall approach and any changes or improvements you would recommend before we proceed further.

Your feedback will help us ensure that the requirements, technical approach, and data model align with project expectations.

Thank you for your time and guidance.

Merging the Email

Dear Team,

We had a discussion with **Krutarth regarding the 73 Broadway project**, focusing on the financial data, transaction reconciliation, and pending documents.
Discussed and Clarified

- Inter project deposits were explained as **short term loans from other projects**.
- The **\$20,000 land acquisition difference** was identified as an accounting error and adjusted. The supporting transaction trail is still required.
- The **\$3,755 escrow difference** was explained as fees related to the funds.
- Labour payments were clarified as being processed through the **BCB account**, while Columbia Bank is mainly used for project funding.
- Construction expenses are mainly reflected through **AMEX**, with supporting receipts still required.
- We also discussed the **construction and finance lifecycle**, from property acquisition and loan approval through construction, draws, completion, and unit sales.
- The role of **KS Investments**, its multiple companies, accounts, and projects was also discussed to understand inter project transactions and avoid duplicate project data.

Pending Data and Documents

- **BCB bank statements for 2025 and 2026**, including missing periods.
- **Bank and draw statements** for loan funding and construction draws.
- Complete **loan agreement, approval documents, HUD statements, and closing documents**.
- Supporting records for the **\$70,000 and \$90,000 deposits**.
- Supporting trail explaining the **\$20,000 adjustment** and why it was recorded later.
- **Draw documents and formats**, including submission, approval, rejection, revision, and funding records.
- Vendor invoices, checks, and receipts supporting the **\$656,154.06 construction costs**, including electrical, plumbing, Home Depot, and other materials.
- Supporting documents for the **\$853,726.40 settlement and other charges**.
- **List of all companies, account numbers owned by KS, and their current projects**.

Once the above information is received, we will proceed with the remaining **financial reconciliation and GroundUp AI workflow validation**.

Divyanshu Rai <divyanshu@empowerelearning.com>

Thu, Oct 1, 2026 at 7:24 PM

To: Pratham Rajbhar <pratham@empowerelearning.com>

Cc: kunal shah <kunalshah0323@gmail.com>, Krutarth Shah <skrutarth08@gmail.com>, Hardik Parikh <hardik@empowerelearning.com>, Dharmesh Gohil <dharmesh@empowerelearning.com>, Karishma Sharma <karishma@empowerelearning.com>, Mohit Assudani <mohit@empowerelearning.com>

Dear Team,

Below is a summary of today's discussion, pending document requests, and action items for alignment.

1. Key Notes

- **392 1st Street**: Complete project reference to map the full lifecycle (acquisition, construction, draws, sales, closing).
- **73 Broadway**: Primary reference project to build and validate the GroundUp workflow.
- **Process Flow**: Reviewed the end-to-end flow from loan approval to unit closing.
- **Data Integration**: Plan to link project-level bank statements, loan docs, HUD statements, draws, invoices, and AMEX transactions.
- **Mapping & Quality**: Highlighted inter-project transfers, account mapping, and human review for incomplete evidence.

2. Pending Documents Required (Kunal / Krutarth)

Please share the following complete documents:

- **73 Broadway:** Full Columbia Bank & BCB statements, AMEX statements, Draw sheet, GC contracts, Amhar docs, and missing loan/HUD statements.
- **392 1st Street:** Expense sheet, draw & transfer bank statements, land acquisition cost, loan approval, HUD statement, invoices, project timeline, draw docs, unit sold & selling price docs, P&L cost/selling price, AMEX statements, GC contract/emails, and draw sheet.
- **General:** Account/project/property mapping and upcoming acquisition data.

3. Work Status & Next Steps

Pratham, Mohit, Divyanshu: Prepare role-based use cases and required data fields.

Reference Query Sheet: [Google Sheets Link](#)
